

1

Turn on the System Power

This system uses a power sequencer to turn the mixer, speakers etc on and off in the correct order.

Simply press the labelled power button (1) once and wait for startup (3 seconds between each socket)

Power off after use

2

Play/Turn up the Channel

Use the labelled Channel Knobs to turn up the volume for your chosen source.

1-3 are connected to the XLR sockets at the front of the room for mic input.

The remaining channels cover **CD/DVD, Tape and External (mini jack at front of the room).**

3

Check/Select Playback Speakers

G39 has 4 speakers, the Channel Mixer is setup with the front speakers on Zone 1, and the rear speaker on Zone 2.

Use the Zone 1/2 buttons on each channel to select where you want sound to go.

4

Master Volume

The Master Volume for the:

**FRONT speakers is Zone 1
REAR speakers is Zone 2**

Each has Bass/Treble Control.

5

Using Projectors

To use the projectors connect the VGA lead (at the front) to your computer.

Use the **Projector remote** (from Room Bookings) to **turn on** the projector:

Front Projector (VGA Input - button 8)
Side Projector (VGA Input - button 8)
