

What's in the box: Zoom Q4n. Power Supply/Charger. USB Lead . 16GB SD Card

The Zoom Q4n is a HD quality video/audio recorder with variable gain and mic positioning. Mic position is changed by sliding the rear slider up/down, then manually adjusting the mic capsules to position Here are the basic operation instructions:

1. Set you mic positions (X/Y, A/B etc) and turn on the recorder (top power button) (remove lens cap)
2. Choose a recording file format using the touch screen. Click: Cogs/Recording then choose video and audio settings and file format. Press X to return to live shot.
3. Set a mic Gain level with the toggle wheel (top) and check level on meters (We recommend a peak level of around -6)
4. Press Record to Start filming, Record again to stop. You can then preview your recording using play on the touch screen
5. Files can be copied off using the supplied USB Cable
